PREVIEW SICAM 2024

**We anticipate and develop
market trends in collaboration
with the most innovative brands
of bathroom furniture and
sanitary ware.**

pensare in modo logico. think logic.

Siamo leader europei OEM nello sviluppo e nella produzione di prodotti in solid surface e marmoresina e siamo riconosciuti in tutto il mondo per la nostra qualità.

We are the OEM European leader in the development and production of solid surface and cast marble products, and we are recognised worldwide for quality.

gruppo industriale. industrial group.

Azienda OEM per B2B

Siamo leader europei nello sviluppo e nella produzione di prodotti in solid surface e marmoresina. Siamo riconosciuti in tutto il mondo per le forniture OEM (Original Equipment Manufacturer) di alta qualità. Operiamo nel B2B, approvvigionandoci di materiali di altissima qualità per produrre lavabi, piatti doccia e vasche da bagno per i nostri partner che cercano prodotti standard, su misura e private label/custom. In 20 anni siamo cresciuti in risposta agli sviluppi del mercato dell'arredo bagno, aprendo linee di produzione di nuova generazione, ampliando la nostra offerta e migliorando il nostro posizionamento logistico in tutta Europa.

OEM company for B2B

We are the European leader in the development and production of solid surface and cast marble products. We are recognised worldwide for high quality OEM (Original Equipment Manufacturer) supply. We operate in B2B, sourcing the highest quality materials to create washbasins, shower trays and baths for our partners seeking standard, bespoke and private label products. Over 20 years we have grown in response to developments in the bathroom furniture market, opening new generation production lines, expanding our offer and improving our logistical positioning across Europe.

Capacità produttiva annuale

Continuiamo ad investire risorse significative in automazione, robotica, software e logistica per gestire al meglio il mercato.

Annual production capacity

We continue to invest significant resources in automation, robotics, software and logistics to better manage the market.

la nostra storia. our history.

Crescita costante nel mondo dell'arredo bagno

Constant growth in the world of bathroom furniture

- | | | |
|-------------|--|---|
| 2000 | Il Gruppo Europak acquista Nicos, specializzata nella realizzazione di componenti in poliuretano, e crea la nuova società Nicos International Spa. | The Europak Group acquires Nicos International, specialising in the manufacture of polyurethane components and creates the new company, Nicos International International Spa. |
| 2003 | Viene aperta la sede di Portobuffolè di 16.400 m ² (Unit 1). | Nicos International moves in the new headquarters of 16,400 sqm. |
| 2004 | La proprietà assume nuovi manager per creare un team giovane ed innovativo. | The property hires new managers to create a young and innovative team. |
| 2005 | Viene inaugurata in Bulgaria la Bulsan, una fabbrica di 9.000 m ² per la produzione di 50.000 lavabi all'anno in Mineralmarmo lucido. | Bulsan is inaugurated in Bulgaria, a 9,000 sqm factory for the production of 50,000 Mineralmarmo® washbasins per year. |
| 2007 | La superficie di Bulsan è raddoppiata, passando da 9.000 a 18.000 m ² . | Bulsan's surface area is doubled from 9,000 to 18,600 sqm. |
| 2008 | Nello stabilimento di Portobuffolè (Unit 1) viene aperta la linea produttiva di lavabi su misura in solid surface. | In the Portobuffolè plant the production line of custom-made solid surface washbasins is opens. |
| 2009 | In Bulsan, la capacità produttiva di lavabi su misura viene ulteriormente aumentata di 50.000 pezzi. | In Bulsan, the production capacity of custom-made washbasins is further increased by 50,000 pcs. |
| 2010 | Vengono realizzate le prime linee di lavabi standard in Mineralmarmo (Easy, Step, Quadro). | The first lines of standard washbasins in Mineralmarmo® (Easy, Step, Quadro) are open. |
| 2011 | La capacità produttiva di Bulsan viene portata ad un totale 150.000 lavabi all'anno, inserendo anche il Mineralmarmo in finitura opaca. | Bulsan's production capacity is increased to a total of 150,000 washbasins per year, including Mineralmarmo® in a matt finish. |
| 2012 | Viene aperta la prima filiale logistica spagnola a Barcellona. | Bulsan opens new Spanish warehouse in Barcelona. |
| 2013 | Vengono presentate al mercato europeo nuove linee di lavabi standard (Easy, Plano, Zen, Cosmos, Minima, Skin). | New lines of standard washbasins (Easy, Plano, Zen, Cosmos, Minima, Skin) are presented to the European market. |
| 2014 | In Bulsan vengono realizzate le prime 2 linee standard di piatti doccia (Pietra e Liscio). | Bulsan starts to produce new standard shower trays. |
| 2015 | Reshoring della linea di piatti doccia dalla bulgara Bulsan allo stabilimento italiano di Portobuffolè (Unit 1), con un nuovo impianto di produzione automatizzato. | Reshoring of the shower tray line from Bulsan in Bulgaria to the Italian plant in Portobuffolè, with a new automated production plant. |
| 2016 | A Portobuffolè (Unit 1) viene completato l'impianto automatizzato e realizzato il magazzino verticale automatico per 7.000 piatti doccia. | In Portobuffolè the automated system is completed and the automatic vertical warehouse for 7,000 shower trays is built. |
| 2017 | Viene aperto il nuovo stabilimento di 14.000 m ² a Prata di Pordenone (Unit 2), utilizzato come centro logistico. | Nicos International opens in Prata di Pordenone (solid surface factory) of 14,000 sqm. |
| 2018 | Lo stabilimento di Prata di Pordenone (Unit 2) viene ampliato a 20.000 m ² per ospitare le nuove linee di produzione dei prodotti in solid surface. Nel 2018 è l'anno della fondazione della Top Custom International, in società con la famiglia Castagnari. | The Prata di Pordenone plant is expanded to 20,000 sqm to accommodate new production lines for solid surface products. |
| 2019 | Avviamento della seconda linea di produzione di piatti doccia a Portobuffolè (Unit 1) per una capacità produttiva annua di 150.000 pezzi
Avviamento di una nuova linea di produzione per lavabi e vasche da bagno in solid surface a Prata di Pordenone (Unit 2). | Start-up of a second shower tray production line in Portobuffolè with an annual production capacity of 150,000 pcs.
Start-up of a new production line for solid surface washbasins and bathtubs in Prata di Pordenone. |
| 2022 | Avviamento di una nuova linea di produzione per lavabi in cast marble per una capacità produttiva annua di 200.000 pezzi. | Start-up of a new production line for cast marble washbasins with an annual production capacity of 120,000 pcs. |
| 2024 | Messa in funzione di una nuova linea produttiva di lavabi "su misura" in solidsurface per una capacità produttiva annua di 37.000 pezzi. | Start up of a new production line for bespoke basins in solidsurface with an annual production capacity of 37,000 pieces. |

proposte. proposals.

Prodotti B2B standard

Abbiamo un'ampia gamma di piatti doccia, lavabi e vasche da bagno, tutti personalizzabili per dimensioni, finiture e colori. Lavoriamo esclusivamente nel settore B2B e la nostra esperienza nel solid surface e nel marmoresina, è il miglior supporto per i nostri clienti.

Standard B2B products

We have a wide range of shower trays, wash basins and baths, all customizable in size, finish and colours. We work exclusively in the B2B sector, and our experience in solid surface and cast marble, for which we are European leaders, is the best support for our customers.

Prodotti customizzati

Per le aziende di arredo bagno e i più famosi marchi internazionali, realizziamo prodotti con materiali propri sviluppando stampi su misura, garantendo ai partner che si affidano a noi il giusto lotto minimo.

Bespoke products

For bathroom furniture companies and most famous international brands, we manufacture products with our own materials developing bespoke moulds, guaranteeing partners who rely on us the right minimum lot.

Private label

La nostra esperienza OEM comprende la produzione di piatti doccia, vasche da bagno e lavabi che produciamo anche per il segmento Private Label, per partner di tutto il mondo. Il know-how dei nostri laboratori e del nostro ufficio tecnico è a disposizione per qualsiasi richiesta.

Private label

Our OEM expertise includes the manufacture of shower trays, bathtubs and washbasins, which we also produce for the Private Label segment, for partners around the world. The know-how of our laboratories and our technical department is available for any request.

flessibilità di personalizzazione. flexibility to customise.

sostenibilità ambientale. environmental sustainability.

Nicos è sensibile alle tematiche della sostenibilità e ha avviato un percorso di sensibilizzazione e miglioramento continuo sui diversi vettori energetici coinvolti nella sua produzione e sugli effetti che questi hanno sui principali indicatori di impatto ambientale come il Total Global Warming Potential (GWP). Grazie all'analisi EPD "Cradle to Gate" condotta sui suoi impianti produttivi, è emerso che un deficit iniziale legato al prodotto di sintesi viene completamente eliminato quando lavoriamo a temperatura ambiente, minimizziamo gli scarti e riutilizzandoli per i sottofondi stradali. Anche nelle produzioni del marmoresina l'impiego di energia elettrica e termica è oltre il 90% meno impattante rispetto a un analogo prodotto ceramico.

Comprendere l'importanza della vita è il primo passo per comprendere il nostro ruolo e la nostra responsabilità.

È fondamentale onorare chi ci ha preceduto e chi verrà dopo di noi.

Sfruttando i pensieri strategici determinati dal COVID19, abbiamo deciso di accelerare e di mettere la sostenibilità ambientale al centro della nostra strategia, per un pianeta migliore da lasciare alle nuove generazioni.

Nicos is sensitive to sustainability issues and has begun a process of awareness and continuous improvement on the various energy vectors involved in its production and on the effects these have on the main environmental impact indicators such as the Total Global Warming Potential (GWP). Due to the "Cradle to Gate" EPD analysis conducted on its production plants, it emerged that an initial deficit linked to the synthetic product is completely eliminated when we process at room temperature, minimize waste, reuse of waste for road surface foundations. Even in cast marble productions, the use of electrical and thermal energy is over 90% less impactful than a similar ceramic product.

Understanding the importance of life is the first step in understanding our role and responsibility. It is essential to honour those who preceded us and who will come after us.

Taking advantage of the strategic thoughts determined by COVID19, we decided to accelerate and placed environmental sustainability at the centre of our strategy, for a better planet to leave to the new generations.

produciamo energia pulita. we produce clean energy.

PRODUCIAMO ENERGIA PULITA

Gestiamo l'aria calda, generata dai compressori, in modo da riscaldare l'acqua che serve agli impianti tecnici, e che riutilizziamo anche per l'alimentazione dei forni, risparmiando molta energia. Inoltre, nel gennaio 2020, abbiamo installato un impianto fotovoltaico da 73,080 kWp, con una produzione annuale di 79.657 kWh (1.090 kWh/kWp), pari ad un abbattimento annuale di 55,8 tonnellate di CO₂. La produzione di piatti e lavabi in cast marble di Portobuffolè contiene l'8% degli scarti di produzione interna, che vengono pertanto riciclati al 90%.

We manage hot air, generated by the compressors, to heat water needed for our technical systems, and which we also reuse to power the ovens, thus conserving of energy.

Furthermore, in January 2020, we installed a 73,080 kWp photovoltaic system, with an annual production of 79,657 kWh (1,090 kWh/kWp), equal to an annual reduction of 55,8 tons of CO₂. The production of shower trays and washbasins in cast marble at Portobuffolè contains 8% of internal production waste, 90% of which is then recycled.

utilizziamo resine Biobased® e plastica riciclata. we use Biobased® resins and recycled plastic.

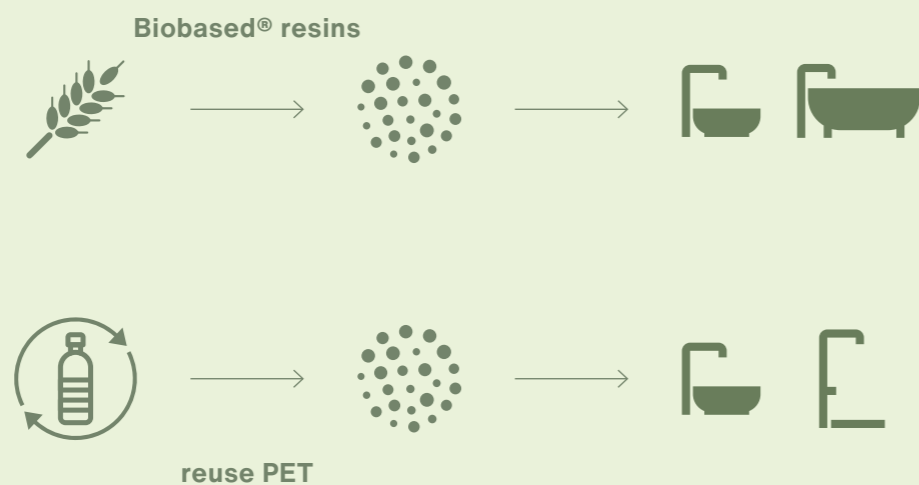

RIUTILIZZIAMO PLASTICA RICICLATA

Abbiamo scelto di salvare il pianeta concretamente: oltre ad essere l'unica azienda al mondo a produrre materiali Biobased®, inoltre possiamo anche offrire la possibilità di produrre lavabi in cast marble con resine contenenti anche PET riciclato.

Tutti possono aiutare a salvaguardare la salute del pianeta cercando di allungare il ciclo di vita della plastica, evitando di gettarla dopo un singolo utilizzo e riciclando correttamente i rifiuti. Noi, come azienda, sperimentiamo nuove tecnologie innovative in grado di valorizzare il riciclo, ottimizzando i processi e creando alternative possibili alla salvaguardia dell'ambiente.

We have chosen to help save the planet in a tangible way: in addition to being the only company in the world to produce Biobased® resins, we have also chosen to reuse a minimum part of PET plastic bottles which, through a process of fragmentation and purification, become a component in the formulation of our resins. We utilize this resin to produce washbasins and shower trays.

We can all help safeguard the health of our planet by trying to extend the life cycle of plastic, avoiding throwing it after a single use and correctly recycling waste. We, as a company, experiment with new innovative technologies to enhance recycling, optimising processes and using viable alternatives to protect the environment.

pensare in modo ecologico. think green.

ARIA:

nel 2012 i nostri materiali hanno ricevuto la certificazione internazionale Green Guard Gold relativa alle emissioni di composti organici volatili in ambienti chiusi, contribuendo alla valutazione della certificazione LEED. I dati e la successiva certificazione vengono esaminati annualmente da un laboratorio terzo.

AIR:

in 2012 our materials received the international Green Guard Gold certification relating to emissions of volatile organic compounds in closed environments, contributing to the LEED certification rating. The data and subsequent certification are reviewed annually by a third-party laboratory.

RICICLO:

il 50% dei materiali di scarto di produzione viene riciclato, l'8% del peso del materiale di un piatto doccia viene riciclato.

RECYCLE:

50% of production waste materials are recycled, 8% of a shower tray's internal material weight is recycled.

RIFIUTI:

il 95% dei rifiuti prodotti negli stabilimenti Nicos viene recuperato in altre filiere produttive.

WASTE:

95% of waste produced in Nicos' plants is recovered in other manufacturing chains.

ACQUA:

i lavaggi ad acqua sono stati sostituiti con metodi di lavaggio a secco e le macchine hanno sistemi di raffreddamento con cicli d'acqua chiusi.

WATER:

water washes have been replaced with dry cleaning methods and the machines have cooling systems with closed water cycles.

ENERGIA:

il 24,4% dell'elettricità utilizzata deriva da fonti rinnovabili. Per 1 kg di prodotto si ha un consumo equivalente di 0,18 kg di CO₂ da combustibili fossili.

ENERGY:

24.4% of the electricity used is derived from renewable sources. For 1kg of product there is an equivalent consumption of 0.18kg CO₂ from fossil fuel.

MATERIALI:

dal 2020 il solid surface viene prodotto con resine da colture organiche a rapido rinnovamento evitando di utilizzare di quelle di origine fossile.

MATERIALS:

from 2020 solid surface material is produced with resins from organic, rapidly renewing cultures, and not from fossil origin.

vasche. bathtubs.

Il bagno come luogo dove vivere il Benessere assoluto, in un rituale sospeso nel tempo e nello spazio. Questa collezione di vasche freestanding e a misura, è nata per regalare atmosfere suggestive, dove relax e intimità si accompagnano alle parole bellezza e design. Le vasche progettate da Nicos International sono realizzate in Solid Surface e Mineralmarmo, tutte esprimono grande qualità produttiva e design esclusivo, con un attento studio del colore e con finiture superficiali che ricordano al tatto la pietra naturale levigata.

The bathroom is a place where we can experience total wellbeing and create rituals suspended in time and space. This collection of freestanding and made-to-measure bathtubs was developed to create evocative atmospheres, where relaxation and intimacy go hand in hand with beauty and design. Nicos International's bathtubs are made of Solid Surface and Mineralmarmo, and all feature high quality manufacturing and exclusive design, along with carefully selected colours and surface finishes reminiscent of the touch of natural polished stone.

lavabi. washbasins.

Linee essenziali e un ricercato studio della forma che incontra la luce per dar vita ad elementi d'arredo esclusivi. I lavabi sviluppati da Nicos International trovano origine nel vero design, dove l'estetica abbraccia sempre la funzionalità. Qui la materia resta protagonista, priva di ogni futile accessorio, ed è all'origine della forma stessa. Le qualità del Solid Surface permettono di dar vita a forme inedite, colori pieni, grande flessibilità progettuale, il tutto racchiuso nella grande solidità strutturale, anche negli spessori più ridotti.

Minimalist lines and an in-depth study of how shape interacts with light as a means of creating exclusive furnishing elements. Nicos International's washbasins are rooted in true design, in which aesthetics always embraces functionality. The material reigns supreme, devoid of all trivial accessories, and plays a key role in the actual design. The qualities of Solid Surface enable highly unusual shapes and vibrant colours to be produced offering great flexibility in terms of design, all embodied within great structural solidity, even where thicknesses are reduced.

appoggio-incasso.

piatti doccia. shower trays.

Le collezioni dei piatti doccia di Nicos International sono state sviluppate con lo scopo di esaltare i sensi. Ogni dettaglio è disegnato per regalare armonia e integrare questo elemento in modo totalizzante nel design progettuale. L'impiego sapiente del Mineralsolid permette di creare finiture superficiali che giocano con il senso del tatto e ricreano gli effetti della pietra, del cemento, del marmo. Qui la materia si plasma ai nostri desideri e si fa portatrice di stile, eleganza, carattere.

Shower tray collections by Nicos International was created with the aim of enhancing the senses. Every detail is designed to create harmony and integrate this element completely into the overall design. The skilful use of Mineralsolid allows surface finishes to be created that play on the sense of touch and recreate the effects of stone, concrete and marble. The material is moulded to our desires and becomes a champion of style, elegance and character.

materiali. materials.

Due famiglie di materiali ecologici, riciclabili e virucidi.

Nei nostri laboratori la ricerca di nuove soluzioni è costante: formulazioni di resine sempre più performanti e green, trattamenti di cariche, sistemi innovativi di polimerizzazione e trattamento delle superfici. Il nostro team di ricerca collabora con università e laboratori esterni, per ottenere risultati sempre migliori, garantiti dalle più importanti certificazioni internazionali; la nostra produzione risponde alle attuali normative di settore - CE per l'Europa e C-UPC per il mercato NORD AMERICANO - e tutti i nostri materiali hanno il "Greenguard Gold Certificate" assegnato dall'americana UL. Nell'ultimo triennio tutti i nostri materiali sono stati potenziati e presentano caratteristiche antimicotiche, autopulenti e antibatteriche; dal 2020 presentano anche caratteristiche virucide per combattere la Sars-Cov-2.

Two families of ecological, recyclable and virucidal materials.

In our laboratories we develop different areas of research: formulations of ever more performing and green resins, treatments of fillers, innovative systems of polymerization and surface treatment.

Our chemists collaborate with universities and external laboratories, in order to obtain ever better results, guaranteed by the most important international certifications: our production meets current sector standards - CE for Europe and C-UPC for USA - while all our materials have the "Gold Certificate Greenguard" awarded by the American UL.

All our materials have been enhanced and present antifungal, self-cleaning and antibacterial characteristics; and also from 2020 virucidal characteristics to fight Sars-Cov-2.

solid surface

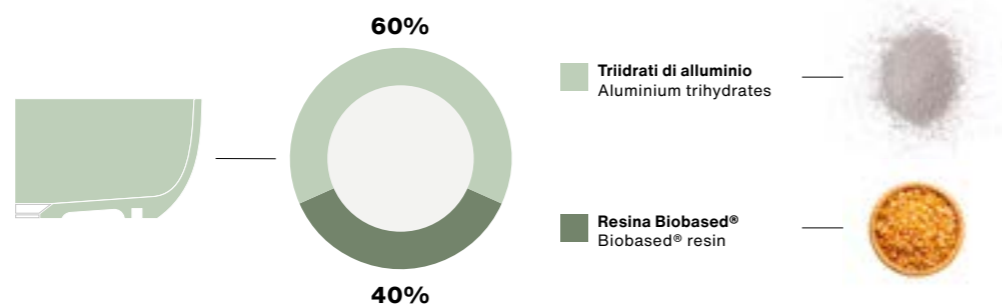

solid®

Con il famoso effetto “soft touch” e una bellezza simile alla pietra naturale levigata, il nostro solid surface è composto da cariche minerali - principalmente triidrati di alluminio - legate a resine naturali Biobased® derivanti da coltivazioni di mais di origine controllata. Le esclusive formulazioni, messe a punto nei nostri laboratori, sono igieniche, setose, resistenti, stampabili, facilmente lavorabili. Il nostro core business è sempre stato l'arredo bagno - piatti doccia, vasche e lavabi - Negli anni questi materiali sono stati utilizzati anche dai più importanti marchi dell'arredamento di alta gamma per lo sviluppo di tavoli, pareti modulari e accessori.

The famous “soft touch” effect and beauty similar to polished natural stone, our solid surfaces comprise mineral fillers – mainly aluminium trihydrates – bound by natural Biobased® resins derived from corn of controlled origin. The exclusive formulations, created in our laboratories, are hygienic, silky, resistant, printable, easily workable and if necessary are used for cuts and punctures. Our core business has always been bathroom fittings – shower trays, baths and washbasins – although over the years these materials have been used by the most important brands of high-end furnishings such as tables, modular walls and accessories.

Triidrati di alluminio + resina biobased
Aluminium trihydrates + Biobased® resin

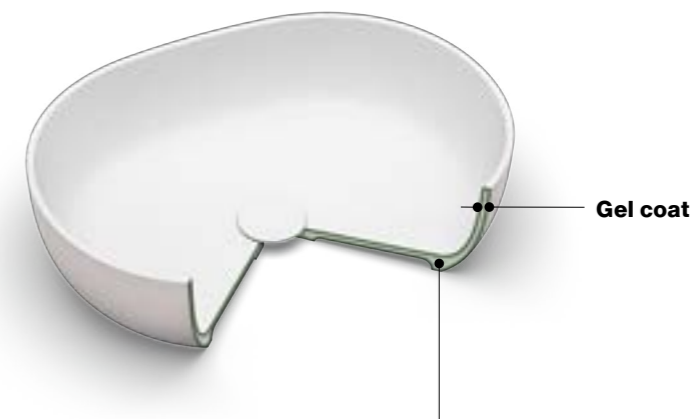

cast marble

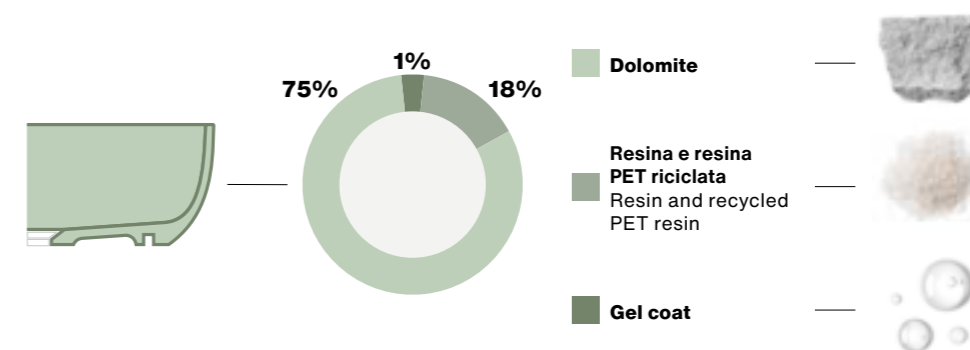

mineralsolid®
mineralmarmo®

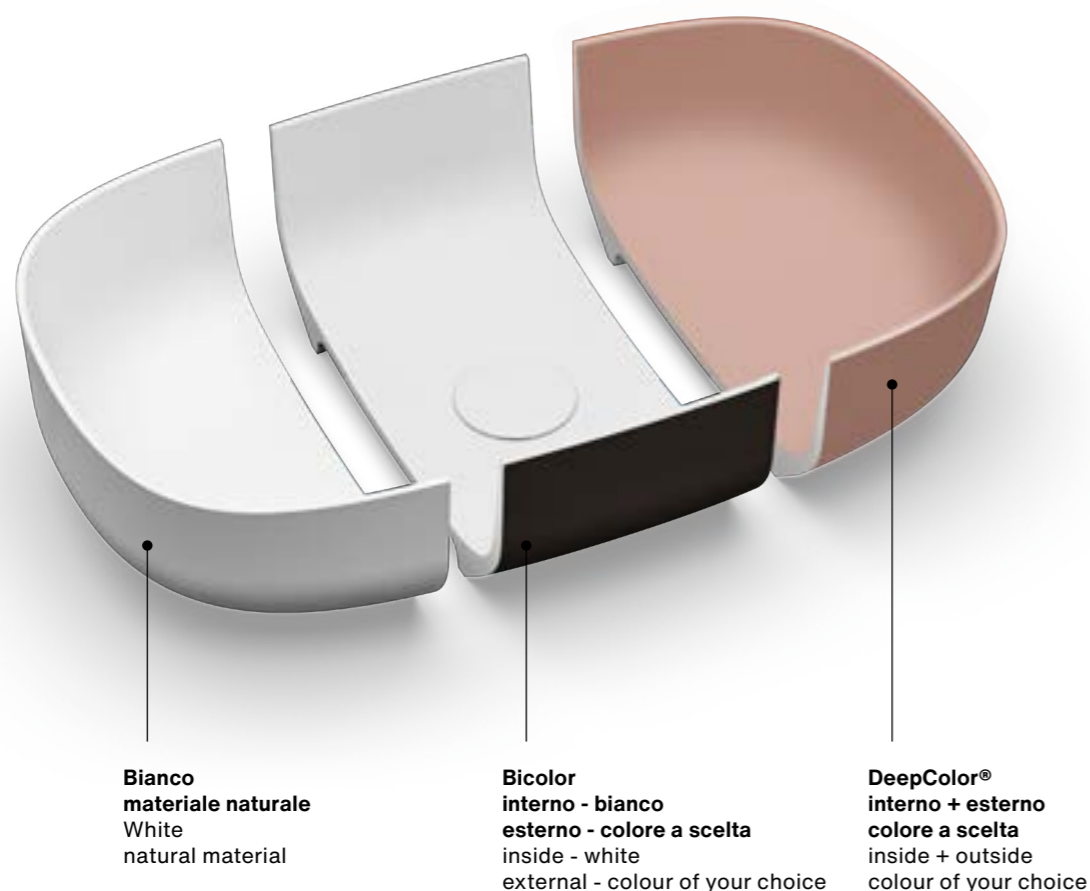

I nostri materiali in marmoresina sono disponibili in diverse finiture, sia opache che lucide. Questi materiali superano la ceramica viste le caratteristiche tecniche superiori e sono spesso richiesti al posto della ceramica tradizionale. Garantiscono una maggiore resistenza anche con uno spessore inferiore, oltre a raggiungere dimensioni impensabili per materiali come la ceramica, il vetro e l'acrilico. Le finiture lucide di alta qualità sono paragonabili al vetro, pur mantenendo prestazioni tecniche eccezionali. La flessibilità produttiva consente inoltre una variabilità cromatica e una ripetitività senza pari con tolleranze minime tra lotti di produzione diversi.

Our cast marble materials are available in multiple finishes, both matt and glossy. These materials out-perform ceramic with superior technical characteristics and are often specified in place of traditional ceramic. They guarantee greater resistance even with a lower thickness, in addition to achieving dimensions unthinkable for materials such as ceramic, glass and acrylic. The high-quality glossy finishes are comparable to glass, while maintaining exceptional technical performance. Production flexibility also allows for chromatic variability and unparalleled repetitiveness with minimum tolerances.

DESCRIZIONE

È un materiale composito realizzato con 2/3 di idrati di alluminio, mescolati magistralmente con resine poliestere modificate con monomeri acrilici dalle alte prestazioni chimico-fisiche. Tutto questo porta ad avere un materiale omogeneo e uniforme in tutto lo spessore, grazie anche all'attenta procedura di realizzazione industriale che può, per certi versi, definirsi ancora artigianale, data la scrupolosità impiegata e la minuziosa attenzione per i particolari. Le principali caratteristiche di questo prodotto sono la compattezza, la resistenza agli agenti chimici e solventi e la resistenza al graffio; inoltre, data l'uniformità in tutto lo spessore, eventuali danneggiamenti possono essere facilmente rimossi utilizzando una spugnetta abrasiva per rinnovare così la superficie.

DESCRIPTION

A composite material made up of 2/3 aluminium hydrates, masterfully blended with polyester resins modified with chemical and mechanical high-performance acrylic monomers. All this yields a material that is homogeneous and uniform throughout its thickness, thanks to an extremely accurate industrial production process that may be, in some ways, still be defined as craft for its thoroughness and meticulous attention to detail. The main characteristics of this product are its compactness, resistance to chemical agents and/or solvents and scratch resistance. Moreover, being uniform throughout its thickness, any kind of damage can be easily removed by rubbing the surface with a scouring sponge to renew the surface.

Bicolor ● opaco | matt

DESCRIZIONE

Per tutti i clienti che non vogliono rinunciare ad un tocco di colore in bagno, abbiamo la possibilità di verniciare solo la superficie eterna dei nostri prodotti... un tocco di classe abbinato alla morbidezza del solid surface.

DESCRIPTION

For all those customers who don't want to give up a touch of color in the bathroom, we have the possibility of painting only the external faces of our products... a touch of color combined with the softness of solid surface.

Deepcolor ● opaco | matt

DESCRIZIONE

DeepColor è una verniciatura a finire bicomponente acrilico-poliuretano e pigmenti. La natura alifatica delle resine conferisce resistenza all'ingiallimento nel tempo, mentre la componente acrilica garantisce resistenza alle sollecitazioni termiche per l'uso nel bagno domestico. L'applicazione con vernice a spruzzo dona al prodotto un aspetto sartoriale unico, all'avanguardia, moderno ed una colorazione compatta e uniforme. DeepColor è applicabile a tutti gli articoli: lavabi e vasche, nei materiali Cristalplant® e Mineralmarmo®. La verniciatura è adatta a tutte le superfici, piane e curve e anche nelle parti soggette a contatto con l'acqua.

Le caratteristiche principali sono:

- Gradevolezza estetica
- Uniformità del colore
- Vasta gamma colori
- Ottima adesione
- Ottima impermeabilità superficiale
- Resistenza allo shock termico
- Resistenza ai raggi UV
- Facilità di pulizia
- Buona resistenza alle macchie
- Buona resistenza agli urti

DeepColor è disponibile in una vasta gamma colori in finitura opaca e lucida:

- 1950 tinte NCS INDEX
- 213 RAL K5 Classic (escluso metallizzati)

DESCRIPTION

DeepColor is a two-component acrylic-polyurethane and pigment finish paint. The aliphatic nature of the resins gives resistance to yellowing over time, while the acrylic component guarantees resistance to thermal stress for use in the domestic bathroom. The application with spray paint gives the product a technical, modern appearance and a compact and uniform color.

DeepColor can be applied to all items: washbasins and bathtubs, in Cristalplant® and Mineralmarmo® materials. The painting is suitable for all surfaces, flat and curved and also in parts subject to contact with water.

The main features are:

- Aesthetic pleasantness
- Color uniformity
- Wide range of colors
- Excellent adhesion
- Excellent surface impermeability
- Resistance to thermal shock
- UV resistance
- Easy to clean
- Good stain resistance
- Good impact resistance

DeepColor is available in a wide range of colors in matte and glossy finishes:

- 1950 NCS INDEX shades
- 213 RAL K5 Classic (excluding metallics)

mineralsolid®

bianco opaco | white matt

DESCRIZIONE

MINERALSOLID® è un materiale composito formato da cariche minerali naturali e resina. È rivestito da uno smalto tecnico ad affetto estetico opaco. Questo rivestimento (800 - 1000 µm) abbina ottime caratteristiche di resistenza a completa ripristinabilità della superficie.

DESCRIPTION

MINERALSOLID® is composed of natural mineral charges and resin. It is coated with a technical enamel that gives it an opaque finish. This coating (800 - 1000 µm) combines excellent resistance to full recoverability of the surface.

mineralmarmo®

bianco lucido | white glossy

DESCRIZIONE

MineralMarmo®, è un materiale composto da cariche minerali naturali (carbonati di calcio e triidrata di alluminio) e resina poliesteri. Lo smalto tecnico lucido che riveste la superficie del materiale è di tipo poliesteri acrilato, caratterizzato da ottime proprietà. L'estetica e le caratteristiche meccaniche e chimiche rendono questo materiale adatto all'arredo di bagno. MineralMarmo® è un materiale molto versatile che permette lo sviluppo di molte forme: lavandini con sottosquadra, lavandini a misura, piani, basamenti, colonnine.

DESCRIPTION

MineralMarmo® is composed of natural mineral charges (calcium carbonate and aluminium trihydrates) and polyester resin. The glossy technical enamel covering the material surface is of the polyester acrylate type of excellent properties. The aesthetic, mechanical and chemical properties make this material suitable for bathroom furniture applications. MineralMarmo® is a very versatile, lightweight material, which makes it possible to manufacture a wide range of object shapes: undercut washbasins, customized washbasins, base elements, columns.

certificazioni certifications

La nostra azienda, i nostri materiali e tutti i nostri prodotti sono costantemente sottoposti a controlli da parte dei più importanti enti certificatori mondiali, per garantire sempre la migliore qualità ovunque.

Our company, its materials and all our products are constantly subjected to checks by the most important certifying agencies, to guarantee the best quality all over the world.

CE marking

La marcatura CE fa riferimento al Regolamento Europeo 305/2011 per i prodotti da costruzione. Questo regolamento stabilisce i criteri di tracciabilità e conformità delle diverse categorie di prodotti da costruzione.

Vasche, lavabi, piatti doccia devono soddisfare specifici requisiti tecnici sia progettuali che prestazionali, essere corredati da una Dichiarazione di Prestazione (DoP) ed essere etichettati CE.

A seguito della Brexit, per Gran Bretagna ed Irlanda del Nord i prodotti devono essere marcati UKCA.

The CE marking refers to the European Regulation 305/2011 for construction products. This regulation establishes the traceability and conformity criteria for the different categories of construction products.

Bathtubs, sinks, shower trays must meet specific technical requirements, both in terms of design and performance, be accompanied by a Declaration of Performance (DoP) and be CE labeled.

Following Brexit, for Great Britain and Northern Ireland the products must be marked UKCA.

C-UPC certification

Per esportare prodotti sanitari in Nord America, la certificazione C-UPC è obbligatoria. Designato come standard nazionale americano, l'Uniform Plumbing Code (UPC) è un codice modello sviluppato dall'International Association of Plumbing and Mechanical Officials (IAPMO) per disciplinare l'installazione e l'ispezione degli impianti idraulici come mezzo per promuovere la salute, la sicurezza e il benessere degli utilizzatori. L'UPC è stato progettato per fornire ai consumatori impianti idraulici sicuri e igienici e, allo stesso tempo, per lasciare spazio all'innovazione e alle nuove tecnologie. Tutti i prodotti Nicos International sono certificati C-UPC.

To export sanitary ware products to North America, the certification C-UPC is mandatory. Designated as an American National Standard, the Uniform Plumbing Code (UPC) is a model code developed by the International Association of Plumbing and Mechanical Officials (IAPMO) to govern the installation and inspection of plumbing systems as a means of promoting health, safety and welfare. The UPC is designed to provide consumers with safe and sanitary plumbing systems while, at the same time, allowing latitude for innovation and new technologies. All Nicos products are C-UPC certified.

UL GREENGUARD certification

La maggior parte dell'esposizione quotidiana alle sostanze chimiche avviene attraverso l'aria che respiriamo nelle nostre case, uffici, scuole e altri ambienti interni. Queste sostanze sono comunemente riferite alla sigla COV (composti organici volatili). I prodotti che utilizziamo per costruire e arredare i nostri ambienti interni possono avere un impatto significativo sui livelli di inquinamento dell'aria interna. I prodotti che hanno ottenuto la certificazione GREENGUARD sono analiticamente testati per soddisfare alcuni degli standard più rigorosi al mondo in materia di COV, contribuendo a ridurre l'inquinamento dell'aria interna agli ambienti e il rischio di esposizione a sostanze nocive, favorendo al contempo la creazione di ambienti interni più salubri.

The majority of everyday chemical exposure in people occurs through the air we breathe in our homes, offices, schools and other indoor environments. These airborne chemicals are commonly referred to as volatile organic compounds (VOCs). The products we use to build and furnish our indoor environments can have a significant impact on indoor air pollution levels. Products that have achieved GREENGUARD Certification are scientifically proven to meet some of the world's most rigorous, third-party chemical emissions standards, helping to reduce indoor air pollution and the risk of chemical exposure, while aiding in the creation of healthier indoor environments.
